Environmental & Sustainability Statement of Intent

25th February 2021

The Environmental and Sustainability Statement of Intent of S&R Interiors (“the Company”) is to ensure, so far as it is reasonably practicable, that its operations will be carried out with a commitment to protecting and enhancing the environment.

To enhance the Company commitment to protecting and enhancing the environment the Company has developed the Environmental Management System to be certified to ISO 14001:2015.

As a business that uses materials that can detract from the natural environment, and generates waste that could potentially harm it, we recognise that we have a responsibility to the environment beyond legal and regulatory requirements, and as such we are committed to reducing our environmental impact and continually improving our environmental performance as an integral part of our business strategy and operating methods, with regular review points. We will encourage customers, suppliers and subcontractors to do the same.

Ryan Blunsom is responsible for ensuring that the Company’s Environmental and Sustainability Statement of Intent is implemented and is disseminated to all interested parties. All Company employees and subcontractors must adhere to the aims and objectives of this Environmental and Sustainability Statement of Intent.

Our stated aims are to:

- Comply with and where possible, exceed all regulatory requirements.
- Continually monitor and work to improve our environmental performance.
- Continually monitor and work to improve and thereby reduce our environmental impacts.
- Where possible, incorporate environmental factors into business decisions.
- Ensure that where relevant, all employees and subcontractors are trained to have awareness of environmental issues that relate to the Company’s activities.
- To undertake annual SMART environmental objectives to enable us to demonstrate to interested parties our commitment to monitor and enhance environmental performance and to actively reduce our environmental impact.

Paper:

- We will seek to minimise the use of paper in our office, using digital means where possible.
- We will recycle paper where possible.

- We will seek to buy recycled and recyclable paper products.

Business Consumables:

Waste products are a necessary by-product of our industry. Waste produced in our business can include off-cuts of timber, off-cuts of sheet materials, wood dust, saw dust, adhesives, stains and varnishes.

- We will always/aim to use timber sourced from FSC or PEFC Chain of Custody suppliers
- We will aim to continuously improve our environmental performance particularly with regards to our choice of products we use, ensuring wherever possible that their use will not cause harm to the environment.
- We will burn our timber waste as fuel in our office and workshop wood burners.

To demonstrate our commitment to sustainable timber purchasing we are accredited by both the Forest Stewardship Council (FSC) and Programme for the Endorsement of Forest Certification (PEFC)

Energy and Water:

- Lights and electrical equipment will be switched off when not in use and open shutters, weather permitting to increase natural light.
- The energy consumption and efficiency of new IT products, workshop equipment and vehicles will be considered when purchasing such items.
- Encourage staff to ensure taps are switched off after use and not to overfill appliances for refreshments. Limit vehicle cleaning.

Transport:

- Driving is a necessary part of our work when we carry out fit out works and where possible we will drive the most fuel-efficient vehicles.
- Through employee awareness on efficient driving, we will seek to reduce our fuel consumption.
- We will ensure that our vehicles are regularly serviced to maintain their optimum efficiency.

Green Culture

- We will involve our staff in the implementation of this Environmental and Sustainability Statement of Intent to achieve greater commitment and improved performance.
- We will work with our suppliers or sub-contractors to encourage them to improve their environmental performance.
- Where possible, we will use local labour and material suppliers to reduce our CO2 footprint.

As we strive for excellence in every aspect of our business, we are totally committed to minimising the environmental impacts of our business operation.

As part of this commitment, we will ensure this Statement of Intent is reviewed and updated as necessary.
